PROFILE

I am a recent graduate in ICT (Innovation, Communication and New Technologies).

During my studies, I acquired several skills.
I learned different programming languages such as:

• Java;
• Python;
• Javascript;

At the same time, I created websites by developing both the front-end and the back-end.

Regarding back-end development, I have acquired skills in MySQL, using the standardized relational database language SQL, I also configured a local home mini-server for file management.

I am a very curious person and eager to acquire more and more computer skills.
